Introductory

The present volume for 1953 is the 25th edition of Henderson's Directory of Lethbridge. The work embodies a complete epitome of the civic, commercial, social, and industrial interests and activities of the municipality. It is a modern Directory in all parts and includes all essential features which have proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

THE DEPARTMENT OF MISCELLANEOUS INFORMATION

THE DEPARTMENT OF MISCELLANEOUS INFORMATION starting on page 5 contains information about Civic History and Industry, as well as a complete list of Apartment and Business Blocks.

THE STREET AND AVENUE GUIDE

THE STREET AND AVENUE GUIDE starting on page 21 features the names of all streets and avenues arranged alphabetically and numerically, giving the location, number on the street, and showing the occupant.

The intersecting streets are shown in the order that they come.

Δ Denotes that there is a Telephone in the house.

♦ Denotes that someone living in the house is the owner.

THE ALPHABETICAL DIRECTORY

THE ALPHABETICAL LIST OF NAMES of citizens, business firms and corporations starts on page 89.

THE CLASSIFIED BUSINESS DIRECTORY

THE CLASSIFIED BUSINESS DIRECTORY at the back of the book exhibits the various manufacturing, mercantile and professional names, compiled under headings appropriate to the class of industry or profession followed.

LETHBRIDGE POPULATION, in excess of 25,000

The Directory estimate of population is based on the actual number of individual's names in the Alphabetical section of the Directory, with due allowance for children and for women whose names are not listed. The Lethbridge Directory covers considerable territory beyond, but tributary to the city limits, which is canvassed in order that the names of all people employed or who purchase in Lethbridge may be obtained.

ADVERTISING LETHBRIDGE

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, the publishers have placed copies of this issue of the Directory in the directory libraries, where they are readily available for reference use by the public. There they serve as perpetual advertisements for business men the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

Respectfully,

The Publishers,

HENDERSON DIRECTORIES LIMITED.

September, 1953

PUBLISHERS' NOTE

The information in this directory is gathered by an actual house to house canvass, and is compiled in a way to insure maximum accuracy.

The Publishers cannot and do not guarantee the correctness of all information furnished them nor the complete absence of errors and omissions, hence no responsibility for same can be or is assumed.

The Publishers earnestly request the bringing to their attention of any inaccuracy so that it may be corrected in the next Directory.

HENDERSON DIRECTORIES LIMITED,
PUBLISHERS.

Lethbridge

"THE IRRIGATION CENTRE OF CANADA"

(By courtesy of the Lethbridge Chamber of Commerce)

LOCATION

Lethbridge is a divisional point on the Crow's Nest Pass line of the Canadian Pacific Railway to Vancouver, 125 air miles southeast of Calgary, 475 air miles east of Vancouver and 700 air miles from Winnipeg. It is on the Oldman River immediately above the site of Coal Banks, where Nicholas Sheran, Alberta's first miner started working on coal facings in 1872. This name was changed in 1885 in honor of William Lethbridge, first president of the North-Western Coal and Navigation Company, which company developed the coal properties at Coal Banks. This exploitation was carried out upon the recommendation of Elliott T. Galt, son of Sir Alexander Galt, one of the fathers of Confederation, and the name of Galt has been associated with the city ever since.

PROGRESS

Lethbridge achieved the dignity of a town in 1891, its first mayor being C. A. Magrath, who was also the first president of the Lethbridge Board of Trade. The town received its city charter in 1906, with a commission form of government being inaugurated in 1914. This was continued until 1928, at which time the managerial form of civic government was instituted and it is still in force.

MUNICIPAL GOVERNMENT

The city council is elected by the popular vote of eligible voters, the mayor being chosen from the councillors at the first meeting of the new council each year. The public and private school boards are also elected by popular vote.

Municipal Ownership:

The city owns its own power, waterworks and filtration systems, and a modern sewage disposal plant. It also operates the local bus transit system.

Other Facilities:

The city and district is also served by natural gas and has more than ample coal supplies. Electricity is available at reasonable rates, supplied by the municipal power plant.

Communication is provided by the lines of the Alberta Government Telephones, whose Southern Alberta headquarters are in Lethbridge.

General Statistics (to Dec. 31, 1952):

| | |
|-------------------------------|---------------|
| Population (estimated) | 25,000 |
| Elevation (approximate) | 2,983 feet |
| Area | 6,400 acres |
| Postal Revenue | \$ 266,963 |
| Land Assessment | 100% |
| Improvements | 66 2/3 |
| Bank Clearings | \$184,207,470 |
| Building Permits | \$ 4,741,855 |

AGRICULTURE

Wheat:

Ideal weather conditions in the Lethbridge district resulted in a bumper crop—in fact the largest on record. Although only 12.48 inches of precipitation were recorded all year, 8.39 inches fell in the growing months, April to August inclusive. With the subsoil filled to the top with rain from 1951, the 1952 precipitation was just enough to bring the crops to maturity under ideal growing conditions, making for heavy yields in many areas and an average of 27.3 bushels

for the year against the long term average of 17½ bushels. The 1952 wheat was heavy, bright in colour and readily millable though a bit light in protein content at around 12.7 per cent against a long-term of 13.7 per cent. Harvest, too, was dry and the crop came off in dry hard condition ready for easy storage. It was well that this was so because the line elevator capacity in the area was still full of 1951 wheat when the new harvest got under way. Millions of bushels of 1952 crop were piled up in the fields on Southern Alberta farms. Some damage has been reported to stored grain, both in bins and in piles, as a result of an infestation of rusty grain beetles which caused some heating. Farmers whose bins are infested are now busy moving the grain from one bin or pile to another to cool it off and get rid of the beetles. Loss from this cause is not expected to be heavy. The total harvest of wheat was approximately 57,300,000 bushels for the two million acres seeded in Crop District 1, 2, and 4 served by the Lethbridge railway division of the C.P.R. The value of the wheat crop is estimated at \$81,000,000.

The year 1952 will go down as a year of two harvests. Due to wet weather it was impossible to harvest more than 23,000,000 bushels of the 1951 crop before the end of the year 1951. However, in the spring of 1952 farmers were able to gather in 13,500,000 bushels of wheat. In this report returns from the 1951 crop are not included in the new wealth production figures for 1952.

Coarse Grains:

Southern Alberta's coarse grain crop was also a record-breaking one. Comparatively little coarse grain from this area goes through commercial channels as it is kept on the farms and ranches in the district. However, like the wheat crop, ideal weather made for exceptional coarse grain crops and indications are that a greater percentage of the 1952 crop will be marketed through the line elevators than for many years past. Oats average 52 bushels to the acre from 220,000 acres for a total of 11,400,000 bushels. Barley yielded 40 bushels to the acre from 382,700 acres for a total of 15,280,000 bushels. The total rye crop was around a million bushels and flax returned about the same.

Dairying:

Fluid milk purchased by distributing plants in Lethbridge was 7,458,317 pounds, an increase of 1.1% over the 7,373,642 pounds purchased in 1951. This was a continuation in the trend of previous years. This trend can be attributed in large measure to the rapid increase in population that has occurred in recent years. Butter manufacture in Census Division No. 2 in 1952 was 1,003,174 pounds. This was a decrease of 5.2% over the 1951 figure of 1,058,444 pounds. The Cheddar cheese production showed a tremendous increase of 38.1% over the 1951 figure. There is no doubt that the tendency in Southern Alberta is to milk fewer cows. The farmer has more remunerative aspects of his operation that do not require as much time and labour. Whether this trend will continue when the new irrigated areas come into use remains to be seen.

The Dominion Experimental Station:

Located just east of the city, was established in 1906 and has been a major factor in the agricultural development of Southern Alberta. The work of the Station has been greatly expanded in recent years to meet the demands for information on a diversity of problems. The Station now comprises about 1,100 acres on which investigations in both irrigated and dry land farming are conducted. Laboratories for cereal breeding, forage crops, wool research, and animal nutrition are in operation.

Canada Science Service Laboratories:

These laboratories, opened in 1949, consist of offices, laboratories with specialized facilities, greenhouses and experimental plots. The main buildings are situated immediately south of the Experimental Station. The Livestock Insect Laboratory is about a half-mile southwest of the main building and the Veterinary Research Station is located on the Oldman River, west of the City of Lethbridge.

The Field Crop Insect Laboratory, which has been located in Lethbridge since 1913, will continue research on insects affecting cereals, sugar beets, vegetables, forage and canning crops. In the past, work on the major insect problems has been directed from this laboratory, but now more intensive research will be conducted on these and new pests as they become a hazard to crop growing. Co-operative research on the development of sawfly resistant wheat is being intensively pursued by the plant breeders.

The Plant Pathology Laboratory is carrying forward research on root rot of winter wheat and on diseases affecting alfalfa. They also are co-operating closely with the plant breeders in developing a wilt and crownrot resistant variety of alfalfa. Annual surveys of plant diseases affecting all crops grown in the district are being conducted.

The Plant Physiology Laboratory will carry on research on various factors concerned with the resistance of cereals and forage crops to insect and disease pests and to winter hardness.

The Chemical Laboratory will carry on research on developing methods for analyzing plant material, etc., for assisting in the production of insect and disease, resistant varieties of cereal and forage crops.

The Livestock Insect Laboratory is a new entomological institution initiating research on insects affecting livestock production. Among the problems being studied are warble flies, horse flies, horse bots, lice and sheep keds.

The Veterinary Research Station is carrying forward research on various diseases affecting livestock and their control. The Cereal Breeding Laboratory, which is a division of the Experimental Farm Service, is housed in the Science Service Laboratories building. The cereal breeders are co-operating closely with the entomologists, pathologists, physiologists and chemists in the production of insect and disease-resistant varieties of crop plants, particularly cereals and forage crops, suitable for dry land and irrigation purposes.

IRRIGATION

Irrigation development in Southern Alberta progressed as rapidly as weather conditions would permit. The season was one of the best on record and the year's program was cleaned up along with uncompleted work from the year previous.

St. Mary Dam and Reservoir:

The main earth dam was virtually completed in 1950. 1951 saw the completion of the spillway and the installation of valves and control works. The dam was officially opened by the Right Honourable J. G. Gardiner Minister of Agriculture, on July 16th, after a struggle with the elements, in the form of floods, to have the structure ready for this occasion. The reservoir filled up to overflowing and the day of the official opening was a beautiful sunny one. The lake was full, with water going over the spillway and conditions were just right for such an occasion.

Water delivered during 1952 totalled well over 195,000 acre feet.

COAL, OIL, AND GAS

Coal:

Inroads made by gas, oil and propane, together with the remarkably warm weather experienced in Western Canada during the late fall and early winter resulted in a decreased production of coal. During the year the Crow's Nest Pass fields produced 2,187,515 tons of coal, the Lethbridge field produced 286,262 tons, and the Taber field 112,283. The value of the coal mined in the three southern fields was approximately \$15,000,00. The labour force declined from nearly 3,000 in 1951 to around 2,700 in 1952. Southern Alberta's coal mining industry has been harrassed by a shortage of skilled miners for more than a dozen years, and even at this time could absorb a few more workers if they were readily available. Despite the fact that many millions of dollars have been sent in the

southern coalfields to mechanize the industry and take much of the backbreaking labour out of coal mining, more experienced workers are leaving the industry than are entering it. Use of fuel oil and natural gas has been substituted for coal by many large consumers and thousands of householders, particularly farmers and ranchers. Hundreds more railway locomotives have been taken out of coal burning to be replaced by diesel locomotives or engines burning fuel oil, and the importance of this to the industry can be appreciated from the fact that a coal-burning locomotive consumes an average of about 4,000 tons annually. However, a note with bright possibilities for the steam coal fields in the Crow's Nest Pass showed itself recently in the announcement that United States interests are considering the establishment of a chain of a hundred steam power plants on top of southwestern Alberta's vast coal reserves. These plants, which would cost an estimated \$1,800,000,000, are being established at two or three a year over a 40-year period, would consume many thousands of tons of coal daily if the immense project materializes.

Oil:

Although significant progress was made in 1952 in the Southern Alberta gas and oil industry, the actual oil production was down compared to 1951. This is accounted for in the reduced output of wells in the Taber and Conrad fields under the Alberta Conservation Board's program of allowables. The Barons and Del Bonita fields showed increases. For the twelve months of 1952, South Alberta fields produced over 297,409 barrels of oil as against 378,078 in 1951.

During the year further confirmation was given of the major wet gas reserves in the Pincher Creek field west of Lethbridge. The production, found 12,000 feet below the foothills in that district, is awaiting a market and the wells are capped. When a market is found Canadian Gulf, which discovered the field five years ago, has indicated that it is prepared to spend \$40,000,000 or more on a drilling program and petro-chemical plant at Pincher, separating oil, propane, butane sulphur and other products from the gas as it comes from the earth. Experts have estimated Pincher's proven area has a potential of 1.6 trillion cubic feet of recoverable gas. Its value is estimated a \$560,000,000 but at the moment it is a frozen asset.

Natural Gas.

During the year 1952 Lethbridge and district saw considerable expansion in the natural gas industry. Extensions were made in many sections of the distribution plants and 689 customers were added to the line. The metered consumption of gas for the year was 4,402,227 M.C.F., an increase of 6% over 1951. The Provincial Government has decided against the export of natural gas from the province until there are proven reserves to take care of Alberta's needs for the next thirty years. If and when it is proved that there are adequate reserves to serve Alberta for the next thirty years the export of gas will be permitted. This has been acclaimed by laymen and expert alike to be a wise and farsighted policy that will result in the best use of this very important of natural resources.

In Brief:

As has been stated elsewhere in this publication, Southern Alberta has vast reserves of coal, oil and natural gas to serve the industries that will undoubtedly gravitate to this area.

TRANSPORTATION

Lethbridge is the divisional headquarters of the Lethbridge division of the Canadian Pacific Railway Company, with direct connections to Vancouver. It also connects with the main line at Calgary and Medicine Hat, and is a focal point for other localities north and south. The Greyhound Bus Lines offer a similar service which is supplemented by the smaller bus companies. Lethbridge is also serviced by the Trans-Canada Airlines with north connections to Calgary, Edmonton, and Alaska, while the Western Airlines supplies a service to Great Falls, Salt Lake City and Los Angeles.

MISCELLANEOUS

The Lethbridge Chamber of Commerce:

The Lethbridge Chamber of Commerce was organized in 1889, with C. A. Magrath as its first president, and it has always played a leading part in city's progress. Information on questions relating to the city and district is available at all times through the office on the mezzanine floor of the Marquis Hotel.

There is also a very active Junior Chamber of Commerce which was organized in 1945. It participates in many projects of a community nature, an outstanding example of which is the fine film projection service which it operates in co-operation with the Lethbridge Public Library, making available to all community organizations a varied program of films. It also has a plan of self development for its membership which is exemplified in its public speaking training classes which have been acclaimed best amongst junior chambers of Alberta.

Living Conditions:

Lethbridge is noted for its wide streets and neat appearance. Ample sunshine, more than anywhere else in Canada where records are kept, and mild winters, make for ideal living. This is proved by the number of people choosing this city in which to retire. Ample supplies of coal and natural gas are available for cooking and heating. Electrical power is supplied by the Municipal Power Plant, which also augments the power supplied to Southern Alberta by the Calgary Power Co.

In 1953 there will be installed an additional 5,000 K.V.A. generator at a cost of \$270,000, to take care of the ever-increasing demand for power in Lethbridge. Building in the city is controlled by a zoning by-law and a Town Planning Commission ensures the orderly growth of the city.

Educational Facilities:

Lethbridge is well-equipped to send its youth out into the world well educated. There are three high and nine elementary schools. Two new schools costing \$600,000 were opened in 1952.

The Public Library is well stocked with books and periodicals and is under the supervision of a qualified librarian. A large addition costing \$80,000 was added in 1951. Here too, is found a Record Library, the latter serviced by the Junior Chamber of Commerce. The Gurney Museum in Galt Gardens is known far and wide for its collection of historical relics and specimens of wild life.

Health and Social Services:

The city now possess two general and one isolation hospital. A new hospital is projected. St. Michael's Hospital built a large addition in 1952 at a cost of \$400,000. The City Health Department is under the supervision of a local physician and has a staff of four. The Nursing Mission renders an invaluable service to the community, nursing and ministering to under-privileged children and carrying out welfare work in general.

Recreational Facilities:

There are ample facilities for recreation in Lethbridge. Playground facilities are sponsored by various service clubs, covering summer and winter sports. There are many sites set apart for parks and these are being developed from year to year. For organized sport there are three ball parks, two golf courses, a soccer field and a privately-owned artificial ice arena, a civic curling and skating rink with artificial ice as well as facilities for boxing, basketball and badminton in the Civic Sports Centre. There is a Y.M.C.A. which carries on the best traditions of that organization. As well as providing recreational and cultural facilities for boys and girls of Lethbridge, the Y.M.C.A. provides room accommodation for young men. A Y.W.C.A. with rooming and boarding facilities for 45 girls is available. There are many cultural groups devoted to the arts as well as social clubs and lodges, etc. The city recreational programme is looked after by a full-time director employed by the city and under the guidance of a Recreation Commission.

Waterton Lakes-Glacier International Peace Park is within easy driving distance of Lethbridge, and many citizens have built summer homes within the confines of the park. This is a popular resort for Canadians and visitors from the U.S. because of the varied opportunities for holiday relaxation. Here one can boat, fish, ride, hike, camp and swim amidst the almost unbelievable beauty of the Rocky Mountains.

CIVIC CENTRE

Proof of the faith of the citizens of Lethbridge in the future is shown by the setting aside of a four-block area in the heart of the city for a Civic Centre. The first building erected was the \$250,000 City Hall. This was followed during 1949 by the Fritz Sick Memorial Swimming Pool and Sports Centre. Part of the cost of this building was paid for by \$100,000 donated by Mr. Fritz Sick, a late resident of this city. The balance of \$250,000 was borne by the city. A hockey, skating and curling rink was built in 1950 at a cost of \$240,000, and a Provincial Government Court House will be completed in 1952. None of the Civic Buildings have any bonded debt.

Educational Information

LETHBRIDGE SCHOOL DISTRICT No. 51

Elected at large. Meets every second and fourth Thursdays in Board Room.

Yale Block, 212 5 St. S.

Please! Do Not Lend Your CITY DIRECTORY

IT COSTS YOU MONEY Every Time It is Loaned

The practice of lending your City Directory, in a great measure, is responsible for the increasing cost of Directory Service.

The reason is:—

There is a definite cost involved in the making of the Directory of Your City.

This cost must be absorbed by the subscribers—be they one—or be they 1000.

If there were but One Subscriber to the City Directory—the One Subscriber would of necessity have to absorb The Whole Cost.

If there were 1000 Subscribers—each one would have to absorb 1/1000 Part of the Whole Cost.

From which it is obvious that the Greater the number of subscribers—the Lesser the cost to each.

Every time you loan your City Directory the Less Necessity there is for the Borrower to subscribe for the Service.

More Borrowers result in Fewer Subscribers, which means Increased Cost.

HENDERSON DIRECTORIES LTD.
